Environmental Policy

As a water and waste water specialist, conservation of natural resources and prevention of pollution are central to the operations of Business Stream's Solutions Department (Business Solutions). Business Solutions understands that its activities have an impact on the environment and that it has a responsibility to monitor and improve its environmental performance.

This policy covers the aspects of Business Solutions' activities which can impact the environment and that it can reasonably control. This includes activities carried out by Business Solutions' employees and individuals under the control of Business Solutions, such as contractors and sub-contractors. This policy does not cover the environmental aspects that arise as a result of the wider organisation's (Business Stream) activities.

As part of the commitment to protecting the environment, Business Solutions will:

- Maintain and continually improve an environmental management system (EMS) aligned with the requirements of ISO 14001:2015.
- Regularly review the EMS to ensure it remains effective and enhances environmental performance.
- Implement all reasonable measures to control the environmental aspects of the company with the goal of protecting the environment and preventing pollution of land, air and water.
- Maintain compliance with all applicable legal obligations and any other requirements related to its environmental aspects.
- Work towards environmental objectives designed to reduce environmental impact and improve environmental performance. These objectives will be reviewed on at least an annual basis.
- Develop programmes to prevent pollution and reduce resource consumption, including fossil fuels.
- Encourage the recovery and recycling of materials wherever possible.
- Reduce environmental impact through its water and waste water solutions services.
- Ensure all employees are trained to work in accordance with this policy and to consider environmental aspects within all areas of the job.

This policy will be made available to all Business Solutions' employees, sub-contractors and suppliers. It will also be made available to our customers and any member of the public or other interested party upon request.

This policy will be reviewed annually.
